

BAMGBOYE OLUWATOSIN ODUNLAMI

Backend | DevOps Engineer

horduntech@gmail.com | Nigeria | www.hordun.tech

SUMMARY

Experienced Backend and DevOps Engineer with 5 years of expertise in building scalable applications, implementing CI/CD pipelines, and managing cloud infrastructure. Proficient in Python, Golang, API development, containerization technologies, and cloud platforms. Adept at collaborating with cross-functional teams to deliver high-quality software solutions.

TECHNICAL SKILLS

Languages: Python, Golang, Rust, PHP, JavaScript, C

Frameworks: FastAPI, Flask, Django, Tensorflow, PyTorch, Laravel, Gin, Axum, Express.js

Tools: Docker, Kubernetes, Cloud Platforms, Bare Metal Servers, GitHub Actions, PostgreSQL, MongoDB, Redis, Minio, Git, Linux, Nvim, Sentry, Elastic Stack, Kafka, Terraform, Helm, Haproxy, Atlasgo, etc...

PROFESSIONAL EXPERIENCE

Backend | DevOps Engineer | AIQ | 2024 - Present

- Designed and developed scalable backend systems with RESTful architectures, geospatial workflows, and distributed components
- Implemented CI/CD pipelines, containerized deployments, and performance-optimized infrastructure with strong networking principles

Backend Developer | Trends.io | 2024 - 2025

- Developed backend components for a social media-style platform with real-time content and user engagement features

Backend Engineer | SkillsForge | 2023

- Developed backend systems for a school management platform, including student enrollment, attendance tracking, and grade management modules

Freelance Backend Developer | Fiverr | 2020 - 2022

- Developed backend solutions for diverse client projects across various industries
- Specialized in building RESTful APIs, integrating third-party services, and optimizing database performance

PROJECTS

DevCommit | Python, API, GitHub Actions, Terminal

A command-line AI tool for autocommits.

Link: pypi.org/project/devcommit/

BareMetal Pipeline | Python, GitHub Actions, SSH, Docker, Kubernetes

A comprehensive GitHub Action for deploying applications to baremetal servers via SSH. This action supports three deployment modes: baremetal (direct to server), Docker, and Kubernetes.

Link: <https://github.com/marketplace/actions/baremetal-pipeline>

Oguild | Python, Golang, packaging

A comprehensive multi-language utilities pack providing essential tools and helper functions for modern software development.

Link: pypi.org/project/oguild/

Eduhub | Python, Django, Celery, Redis, PostgreSQL

EduHub is a modern, feature-rich Learning Management System (LMS) built with Django that provides comprehensive educational tools for both teachers and students

Link: <https://github.com/Hordunlarmy/eduhub>

StealthPortal | Django, FastAPI, Flask, Docker, Websockets

a web-based communication platform that enables users to securely connect and exchange messages through a simple and intuitive interface

Link: <https://github.com/Hordunlarmy/StealthPorta>

EDUCATION

Software Engineering | HOLBERTON SCHOOL | 2023 - 2024

- Comprehensive software engineering program covering full-stack development

Higher National Diploma in Accountancy | MOSHOOD ABIOLA POLYTECHNIC | 2013 - 2019
